

You know the Checker taxicab... it's the roomy, comfortable car with the flat rear floor, the two jump seats and the higher, wider door openings that let you enter and leave with dignity. The Checker is renowned among fleet owners all over the world for its dependability, stamina and economy.

## NOW MEET THE BIG MARATHON

Built on the same production line in Kalamazoo, Michigan as the Checker Taxicab, the limited production Checker Marathon is a new and different idea in family and business passenger cars. Combining the doubly safe, double channel X-Brace Frame with a taxi-proven super strong chassis, the Checker is built for comfort, safety and long life. A shorter 120" wheel base and the elimination of the useless overhang in both front and rear allows you to maneuver thru city traffic like a cab - park like a compact. The tremendous interior of the four door sedan seats 8 adults in limousine comfort. Since the Checker will not be devalued by yearly model changes, it will still be in style long after other makes quit running. So... if comfort and safety, durability and economy make real sense to you, check up on a Checker. Available as a four door sedan or four door station wagon. See a Checker dealer listed here, or send to the factory for a brochure.

Checker Motors Corp., Dept. T-1, Kalamazoo, Michigan.
