

**FORWARD**

This supplement has been prepared for use with the Checker Motors Corporation Chassis and Body Service Manuals beginning with chassis No. 80000 and the Check Motors Corporation Chassis and Body Service Manual Supplement beginning with chassis No. 90000.

The Group Index, this page, lists only the groups that have changes and covers only the changes on Checker vehicles beginning with chassis No. 00001.

Refer to the Checker Motors Corporation Chassis and Body Service Manuals beginning with chassis No. 80000 and Chassis and Body Service Manual Supplement beginning with chassis No. 90000 to complete the service coverage on Checker vehicles beginning with chassis No. 00001.

Summaries of new special tools, when required, and specifications for vehicle components are included at the end of each group.

When reference is made in this supplement to a brand name, number or specific tool, an equivalent product may be used in place of the recommended item.

All information, illustrations and specifications contained in this literature are based on the latest product information available at the time of publication approval. The right is reserved to make changes at any time without notice.

**CAUTION**

*This vehicle contains some parts dimensioned in the metric system as well as in the customary system. Some fasteners are metric and are very close in dimensions to familiar customary fasteners in the inch system. It is important to note that, during any vehicle maintenance procedures, replacement fasteners must have the same measurements and strength as those removed whether metric or customary. (Numbers on the heads of metric bolts and on surfaces of metric nuts indicate their strength. Customary bolts use radial lines for this purpose, while most customary nuts do not have strength markings.) Mismatched or incorrect fasteners can result in vehicle damage or malfunction, or possible personal injury. Therefore, fasteners removed from the vehicle should be saved for re-use in the same locations whenever possible. Where the fasteners are not satisfactory for re-use, care should be taken to select a replacement that matches the original. For information and assistance, see your Checker dealer.*
