JUL 1 1959.

Subject: Brakes

Description: Lining Identification

With the installation of four brake groups which are now available, identification of each brake assembly is required for service.

Brake groups are stamped on Serial Identification plates located on the cowl (underhood).

Plate stamping:

- C Designates "C" type self-energizing brake with Marshall Eclipse lining.
- VA Designates "VA" type self-adjusting brake with JM 1105 lining.
- C-T Designates same brake as "C" with the addition of treadle-vac (Power Brake).
- VA-H Designates same brake as "VA" with the addition of Hydrovac (Power Brake).

Reverse of this bulletin lists the color code chart for "C" type brake lining identification.
