Subject: PAINT

Description: APPLICATION OF DECALCOMANIA

Recommendations for proper application of front door, rear door and Checker border decalcomanias:

1. Apply mounting varnish with clean soft pad.
2. Apply thin coat of varnish over decal.
3. Allow varnish to dry on decal until it becomes tacky.
4. Wash surface where decal is to be applied with a soapy-water mixture. (A small amount of liquid soap is recommended.)
5. Place transfer in position on this wet surface, and with palm of hand, press down lightly.
6. Using a flexible scraper, work out all surplus water and air bubbles. Keep backing paper dry.
7. Peel off heavy backing paper and roll the thin tissue backing paper with a rubber roller until all air bubbles are worked out.
8. Allow to set for approximately 15 minutes, then wet the tissue paper and peel off.
9. Wash off with a naphtha-dampened cloth all varnish residue around the edges of decal, and wipe dry immediately.
