SUBJECT: W.G.B. AUTOMATIC TRANSMISSION FILTER

Effective immediately, the above mentioned transmission filter will be cancelled and the attached listing shows the disposition of stock involved. Stock of the main filter assembly, part number 97424, has been depleted and therefore presents no problem. In place will be a standard filter pad mounted in both single range and dual range automatic transmissions by Warner Gear and for adverse conditions, the Fram filter installation, covered by bill of material Group No. C-260, Sheet No. S-97, will be available as an option.
